**Monday, February 1st -** First Day of Second Semester - School Resumes at 8:00 am

---

## FALL FESTIVAL FUN!

On Wednesday, October 28th, AISN held its annual Fall Festival. Elementary students participated in fun games including: Harvest Bingo, Musical Chairs, Pin the Nose on the Witch, and the Bean Bag Toss. Middle and high school school students were part of a friendly pingpong tournament. Special treats included sweets and ice cream sundaes! It was a great way to start the long weekend!

**Thank you for your support at home!** One of the keys to a student's growth and progress, both academically and behaviorally, is regular communication between home and school. Over the past couple weeks, teachers and parents had the opportunity to meet together to discuss the progress as well as the successes and any areas of concern for students. AISN teachers are always available to meet with parents and/or students as needed throughout the school year. Feel free to reach out to teachers directly or contact Ms. Aicha to set up an appointment.

**Exact Path - A Path to Student Success!** This year, students will have supplementary reading and math practice available to them through an exciting new application, Exact Path, which combines adaptive diagnostic assessments with individualized learning pathways to promote growth for students. Students will have specified time to work on their individualized practice plan throughout the school week and are encouraged to work on it independently as well to further develop their skills. For more information about Exact Path practice, contact your teachers.

**CDC's Hand Washing Tips:** A major way to prevent the spread of germs is just by regularly washing your hands. According to the CDC, everyone should:

- Wash your hands often.
- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing.

*It's especially important to wash:*

- Before eating or preparing food
- Before touching your face
- After using the restroom
- After leaving a public place
- After blowing your nose, coughing, or sneezing
- After handling your mask
- After changing a diaper
- After caring for someone sick
- After touching animals or pets

*If soap and water are not readily available:*

- Use a hand sanitizer that contains at least 60% alcohol.
- Cover all surfaces of your hands and rub them together until they feel dry.

*Avoid touching your eyes, nose, and mouth with unwashed hands.*
